Summary

DevOps Engineer with a strong foundation in AWS, Python, Linux, MySQL, Kubernetes, and Docker. Skilled in automating processes and improving efficiency. Eager to contribute technical expertise to dynamic teams, solve complex problems, and drive innovation. Looking for my next challenge to improve my skills, tackle difficult problems, and enjoy the process of continuous learning and growth.

Work Experience

NOC Operator, Wecom Mobile

2025 - 2025

Responsible for monitoring network infrastructure, troubleshooting system issues, and ensuring continuous service availability. Work with monitoring tools like Zabbix and Grafana to detect problems, document incidents, and coordinate with technical teams for quick resolution.

Education

Computer Science - The Open University of Israel

2024 - Present

student pursuing a Bachelor's degree in Computer Science.

Nitzanim to Tech – Full Stack and DevOps Training

2024 - 2024

Completed a intensive DevOps program where I mastered AWS, Docker, Kubernetes, and CI/CD pipelines while developing automation solutions for real-world projects. Collaborated with high-tech industry mentors to implement best practices in cloud infrastructure, systems integration, and infrastructure management.

Maxim-Levi High School

2017 - 2019

Expanded studies in Computer Science and Physics.

Military Service

Cipher Defender, IDF

2020 - 2022

Specialized in encryption and security for sensitive military communications. Managed the transfer, configuration, and implementation of encryption keys between computer systems and military devices. Performed security testing and maintenance of encryption equipment while developing processes to enhance protection of classified data.
