Summary

Junior DevOps Engineer with a strong foundation in AWS, Python, Linux, MySQL, Kubernetes, and Docker. Skilled in automating processes and improving efficiency. Eager to contribute technical expertise to dynamic teams, solve complex problems, and drive innovation. Looking for my next challenge to improve my skills, tackle difficult problems, and enjoy the process of continuous learning and growth.

Education

Nitzanim to Tech – Full Stack and DevOps Training

2024 - 2024

Completed an intensive program focused on Full Stack development and DevOps practices.

- Gained hands-on experience with technologies like AWS, Docker, Kubernetes, and CI/CD pipelines.
- Developed automation solutions to streamline software deployment and infrastructure management.
- Collaborated on real-world projects, implementing best practices in coding, cloud infrastructure, and systems integration.
- Enhanced problem-solving skills and worked closely with mentors from Israel's high-tech sector.

Maxim-Levi High School

2017 - 2019

Expanded studies in Computer Science and Physics.

Military Service

Cipher Defender, IDF

2020 - 2022

Engaged in encryption and securing sensitive communication systems in the IDF.

- Transferred encryption keys from computers to military devices to ensure secure communication.
- Operated and maintained encryption devices, including manual configuration and implementation of encryption keys.
- Handled the devices directly for data encryption, security testing, and ensuring their proper functionality.
- Developed a deep understanding of advanced encryption systems and improved processes for protecting classified data.

Jobs

Non technological position service industry

2022 - 2024

customer service as a barista
